

# StepStone

A new path for teaching  
with technology.

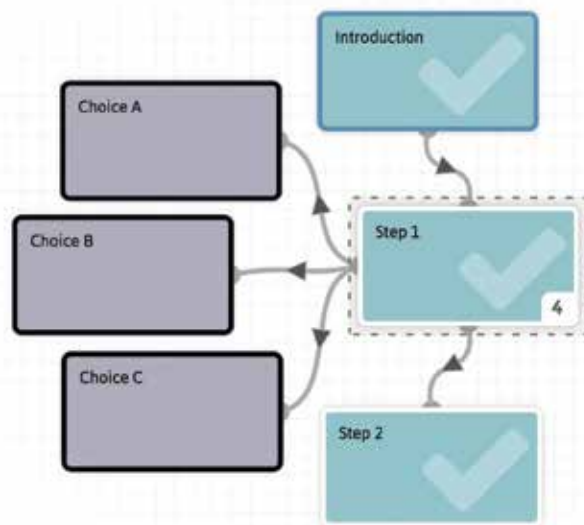

Create your own e-learning modules quickly and easily with our web-based authoring solution. StepStone allows faculty to produce interactive, media-enriched learning resources that will take your teaching to the next level.

# Authoring with StepStone

Start with an Introduction and Conclusion, then add Steps to construct a unique Learning Path. A Path can be anything from a simple informative sequence to a comprehensive narrative journey.

Map your entire Learning Path and add content later or author one Step at a time. Integrated notes and status markers help you keep track of progress and development ideas.

Frame your content with an expanding library of layouts and presentation formats. Use the Media Manager to add images, rich text documents and streaming video. Select preview mode to view a real-time simulation of the learner experience on a variety of devices.

## Learning with StepStone

Publish a standards-based, responsive HTML5 learning package for desktop, tablet and mobile devices.

Enrich Learning Paths with interactive components and supplemental resources, including:

- High resolution image zooming
- Streaming HD video
- Dynamic Multimedia Clipboard

Apply branching pathways to encourage exploration or impose consequences using an assortment of behaviors and feedback triggered by learner decisions.

Motivate learners toward completion with an optional achievement system that can unlock content and reward accomplishments.

## Teaching with StepStone

Bundle one or more Learning Paths into a complete course using the Publisher tool.

Deploy the SCORM 1.2 compliant course on your LMS for efficient course management.

Track learner activity, progress, and completion through graded post-course assessments, satisfaction surveys and downloadable certificates.
