

# Foreign Animal Disease Investigation Course

This training provides FADDs and animal health technicians with the proper steps to conduct field investigations, collect samples, use personal protective equipment, and tools to respond effectively when faced with a foreign animal disease outbreak.

TEXAS A&M UNIVERSITY  
Veterinary Medicine  
& Biomedical Sciences

# Accelerate Learning

By the end of this course, learners will be able to explain and follow the FAD protocols to conduct field investigations, apply FAD procedures, the reasons behind those procedures, and best practices of conducting field investigations to make decisions, and utilize APHIS tools and resources, including the field manual and FAD Prep website, to conduct field investigations. Learners will receive a certificate of completion at the end of each module.

## What's Included

### Learning Modules

- Sale Barn  
(Contact time: 2 hours)
- Slaughter Plant  
(Contact time: 2 hours)
- Free-Range Chicken Farm  
(Contact time: 2 hours)

### Case Studies

- Avian Influenza
- Seneca Valley Virus
- Foot and Mouth Disease

### Instructor Tools

All modules and case studies include an assessment pack that can be utilized to support formative or summative assessment of learners. Instructions on how to run activity reports and learner analytics are provided.

## Audience & Delivery

Designed to serve foreign animal disease diagnosticians and animal health technicians

Web-based HTML5 content streams directly to learners via password protected learning management system.  
Runs on PC, MAC, and Tablet-devices.

## Authored By

The United States Department of Agriculture  
Texas A&M University College of Veterinary  
Medicine & Biomedical Sciences
