

Dentistry

COURSE PACKAGE

This course package helps students safely and effectively perform common dental extractions and nerve blocks. Assign the modules as independent study before labs and watch your students' skills and confidence grow.

Accelerate Student Learning

This course package contains modules and case studies designed to help veterinary students learn how to manage common canine and feline dental disorders. Step-by-step videos demonstrate clinical procedures, while case studies provide students with opportunities to hone their case management skills.

What's Included

Learning Modules

- Dental Extractions: Canine
(Contact time: 1.5 hours)
- Dental Extractions: Feline
(Contact time: 1 hour)
- Dental Nerve Blocks
(Contact time: 1 hour)

Case Studies

- Periodontal Disease: Canine (Sadie)
(Contact time: 0.5 hours)
- Feline Tooth Resorption (Indy)
(Contact time: 0.5 hours)

Instructor Tools

All modules and case studies include an assessment pack that can be utilized to support formative or summative assessment of students.

Audience & Delivery

Designed to complement :

- Small animal medicine and surgery
- Dentistry
- Clinical rotations (e.g., dentistry, small animal surgery, primary care)

Web-based HTML5 content streams directly to students via password protected learning management system.

Runs on PC, MAC, and Tablet-devices.
