

FEED THE FUTURE

The U.S. Government's Global Hunger & Food Security Initiative

Sanitary and Phytosanitary (SPS) Online Training Courses

The USDA Food Safety for Food Security Partnership and its interagency partners have developed a powerful suite of online distance learning modules and training resources to strengthen the knowledge of regulators in foreign countries, as well as other relevant practitioners. SPSCourses.com provides access to these resources to support efforts to integrate Sanitary and Phytosanitary (SPS) interventions and address food safety, animal health, and plant health in trade along agricultural value chains.

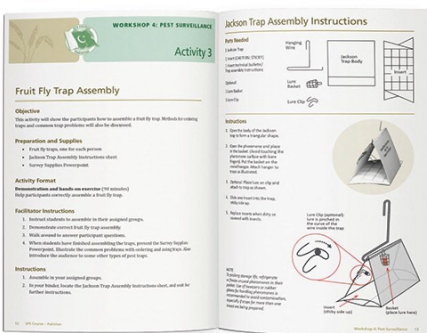

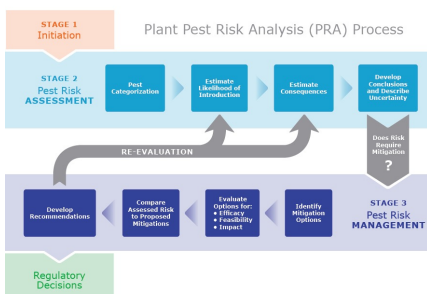

Get Started Today:

1. Visit www.spscourses.com
2. Create a free account and profile.
3. Take available learning modules at your own pace and switch between offered languages, based on your preference.
